

LG Canada catalogue placement map

What goes in each hotspot and where the remaining families can go

14 scenarios / 32 product hotspots

The working baseline accepted by Carlos is shown first. Each numbered hotspot has a product role and documented model choices. The second section proposes the additional placements and settings needed to represent more of the Canadian catalogue. Final product selections remain subject to LG Canada sign-off.

Baseline scenario	Hotspots	Page
01 Hospital	01–03	2
02 Attached coffee drive-through	04–05	2
03 Restaurant	06–08	3
04 Supermarket	09–11	3
05 Meeting room	12–14	4
06 Condo kitchen	15–17	4
07 Condo living room	18–19	5
08 Condo laundry	20–21	5
09 Condo bedroom	22–23	6
10 Condo home office	24–26	6
11 Condo theater	27–28	7
12 Building exterior	29	7
13 Central lobby	30–31	8
14 Elevator	32	8

How to read the map

Model choices: select one candidate for the same role, after the stated fit checks. A matching family name does not guarantee interchangeability.

Layout variant: keep the scenario but change cabinetry, mounting, utilities or room arrangement. Add a hotspot: show another product alongside the baseline.

01–32 are product hotspots; navigation arrows are counted separately. P01–P33 are optional added product or system hotspots. A system hotspot can describe several physical components. ES means climate and energy solutions. Sources and final LG decisions are at the end.

Next Latam | Proposed scope for LG Canada review
Carlos Marruffo | Creative Technologist / Product Manager

Accepted baseline scenarios

Choose one model per hotspot. All named products are documented candidates, subject to current Canadian status and fit approval.

01 Hospital

Hotspot and product	Model choices at this hotspot	How to use the choices
01 Clinical review monitor	27HJ712C-W	Candidate for a clinical-review desk. Diagnostic and surgical roles need their own placement.
02 Diagnostic monitor	21HQ613D-B 32HQ713D-B	Choose for the approved diagnostic use. Different display shapes and clinical roles; LG and hospital review required.
03 Entrance information display	55UH5Q-E	Indoor, protected entrance. Other approved signage sizes can use a wall-layout variant.

More catalogue here Add a patient-room TV at P15. Surgery and X-ray acquisition use the proposed contexts on page 12.

02 Attached coffee drive-through

Hotspot and product	Model choices at this hotspot	How to use the choices
04 Outdoor menu display	55XE4P-B	Candidate outdoor display. Final mounting, weather exposure and support details require approval.
05 Second outdoor menu display	55XE4P-B	A second physical display with its own content. It may repeat the model at hotspot 04.

More catalogue here Window-facing LCD belongs behind glass at P10. An indoor or window-facing display is not an outdoor replacement.

Accepted baseline scenarios

Choose one model per hotspot. All named products are documented candidates, subject to current Canadian status and fit approval.

03 Restaurant

Hotspot and product	Model choices at this hotspot	How to use the choices
06 Main indoor menu display	55UH5Q-E	Candidate for the main menu wall. Other screen sizes need a checked mounting and layout variant.
07 Secondary information display	55UH5Q-E 32SM5J-B	Choose a larger UHD panel or compact FHD panel. Resize the placement and content; they are not identical-fit models.
08 Climate indoor unit	LG cassette or ducted indoor-unit family Exact model pending	A ceiling-layout choice. LG must specify the matched system, room load and visible indoor unit.

More catalogue here Kiosk P09, window display P10 and LED P12 add different installations. Professional TV can be an approved variant of 06 or 07.

04 Supermarket

Hotspot and product	Model choices at this hotspot	How to use the choices
09 Aisle or promotion display	55UH5Q-E	Candidate indoor signage. Additional sizes and portrait orientation require layout and content variants.
10 Checkout promotion display	32SM5J-B 55UH5Q-E	Choose the screen that fits the checkout zone. This is information signage, not a payment terminal.
11 Climate indoor unit	LG cassette or ducted indoor-unit family Exact model pending	LG selects the terminal and matched system after the store load and ceiling design are defined.

More catalogue here Add kiosk P09, window-facing signage P10 or ultra-stretch fascia P11. A modular LED installation uses P12.

Accepted baseline scenarios

Choose one model per hotspot. All named products are documented candidates, subject to current Canadian status and fit approval.

05 Meeting room

Hotspot and product	Model choices at this hotspot	How to use the choices
12 Presentation or collaboration display	86TR3DQ-B CreateBoard 55UH5Q-E signage	Different functions: interactive board or passive presentation. Choose one layout after size, touch reach and ports are checked.
13 First desk monitor	27BA650-B 27BA750-B	Same published physical envelope, weight and VESA. Best same-space candidates; check ports and host support.
14 Second desk monitor	27BA650-B 27BA750-B	Choose independently from the same pair. A second screen remains a separate hotspot.

More catalogue here Add projector P24, laptop P25 or cloud device P27. Larger, curved or specialist monitors use an approved desk-layout variant.

06 Condo kitchen

Hotspot and product	Model choices at this hotspot	How to use the choices
15 Refrigerator	LF27NCH10S LF24Z6530S	Both are counter-depth French-door candidates. Same stated width and height; depth and door motion differ.
16 Electric slide-in range	LSEL6335XE LSEL6333XE	Same nominal width. Height and installation dimensions differ; check counter alignment and utilities.
17 Dishwasher	LDNTH862S LDNTH753S	Same published external envelope. Check cutout, connections, levelling and door opening before selecting.

More catalogue here Other fridge formats use cabinet variants. Gas, induction, freestanding and double-oven ranges use utility/layout variants. Built-in cooking adds P01–P04.

Accepted baseline scenarios

Choose one model per hotspot. All named products are documented candidates, subject to current Canadian status and fit approval.

07 Condo living room

Hotspot and product	Model choices at this hotspot	How to use the choices
18 Television	OLED65C6PUA OLED55C6PUA 65QNED8MBUA	Choose one TV. Recheck wall or console fit: the QNED stand is much wider than the C6 stand.
19 Climate indoor unit	LG wall, cassette, ducted or console family Exact model pending	Choose the indoor format and matching system. A change of format is a room-layout variant.

More catalogue here Other OLED, QNED, NANO, Micro RGB, Gallery, Wallpaper and True Wireless TVs use approved wall variants. Add audio P23, mobile screen P28, purifier P31 or recliner P33.

08 Condo laundry

Hotspot and product	Model choices at this hotspot	How to use the choices
20 Front-load washer	WM6700HBA	Baseline front-load candidate. Other front-load models need exact fit and connection checks.
21 Electric vented dryer	DLEX6700B	Baseline dryer candidate. Gas or standalone heat-pump dryers need different utility and installation variants.

More catalogue here Top-load washers need a lid-opening layout. Add tower P05, all-in-one P06, Styler P29 or vacuum P30. Pedestals, SideKick and stacking kits require a compatible configuration.

Accepted baseline scenarios

Choose one model per hotspot. All named products are documented candidates, subject to current Canadian status and fit approval.

09 Condo bedroom

Hotspot and product	Model choices at this hotspot	How to use the choices
22 Television	OLED65C6PUA OLED55C6PUA 65QNED8MBUA	Choose the size and mounting style that fit the bedroom. Different TV bodies need separate assets.
23 Climate indoor unit	LG wall, cassette, ducted or console family Exact model pending	A reserved climate placement. LG selects the room-appropriate unit and approved system pairing.

More catalogue here Hotel TV can use a guest-room layout variant. StanbyME or Swing needs floor position P28; Styler P29 and air purifier P31 are additional products.

10 Condo home office

Hotspot and product	Model choices at this hotspot	How to use the choices
24 Desk monitor	32UN880K-B	Ergo arm candidate. Other UltraFine, UltraWide, UltraGear, QHD, Full HD or smart monitors need checked desk/stand variants.
25 Television	OLED65C6PUA OLED55C6PUA 65QNED8MBUA	Separate TV placement from the desk monitor. Select for the wall and viewing distance.
26 Climate indoor unit	LG wall, cassette, ducted or console family Exact model pending	Choose indoor format and paired system. Do not use this slot for audio or another IT device.

More catalogue here Add gram laptop P25, gram +view P26 or a thin/zero client P27. A mobile smart screen needs P28.

Accepted baseline scenarios

Choose one model per hotspot. All named products are documented candidates, subject to current Canadian status and fit approval.

11 Condo theater

Hotspot and product	Model choices at this hotspot	How to use the choices
27 Television	OLED65C6PUA OLED55C6PUA 65QNED8MBUA	Choose one TV. Ultra-large, Gallery, Wallpaper and True Wireless formats require a dedicated room variant.
28 Climate indoor unit	LG wall, cassette, ducted or console family Exact model pending	Choose a room-appropriate format and paired system. Noise, airflow and visibility affect the theater layout.

More catalogue here Add audio P23 or CineBeam projection P24. A MAGNIT/direct-view LED wall is a separate installation at P12.

12 Building exterior

Hotspot and product	Model choices at this hotspot	How to use the choices
29 Outdoor identity display	55XE4P-B	Outdoor LCD candidate. Verify structure, mounting, power, weather exposure and viewing distance.

More catalogue here Outdoor LED uses P12 with its own structural design. Outdoor climate equipment and hydronic services need the mechanical context on page 13.

Accepted baseline scenarios

Choose one model per hotspot. All named products are documented candidates, subject to current Canadian status and fit approval.

13 Central lobby

Hotspot and product	Model choices at this hotspot	How to use the choices
30 Welcome and wayfinding display	55UH5Q-E	Candidate indoor information display. Other approved sizes use a wall-layout variant.
31 Reception desk monitor	27BA650-B 27BA750-B	Same published physical envelope and mount pattern. Check connections for the chosen workstation.

More catalogue here Add transparent OLED P07, a video wall P08 or a public kiosk P09. The reception monitor assumes a staffed desk, not a self-service kiosk.

14 Elevator

Hotspot and product	Model choices at this hotspot	How to use the choices
32 Passenger information display	32SM5J-B	Concept candidate only. Cabin fit, mounting, power and elevator-specific safety approval remain open.

More catalogue here Ultra-stretch P11 is a separate header/fascia layout if approved. Digital content and management software can appear in the product information panel.

Proposed additions at a glance

Expand by product family, not by duplicating rooms. Most new families can use another placement or an alternate layout in the existing building. New scenarios are useful where the real installation or workflow is different.

Proposed setting	Added hotspots	How it changes the building
Built-in kitchen	P01–P04 4 product hotspots	Alternate kitchen layout, or 1 additional kitchen scenario if both layouts must be visited. See page 10.
Laundry comparison	P05–P06 2 product hotspots	Two demo bays in the laundry, or 1 additional comparison scenario. See page 10.
Display installations	P07–P12 6 optional hotspots	Place in lobby, retail or exterior. A dedicated gallery is optional. See page 11.
Medical and data center	P13–P15 plus optional data-center system view	Surgery and radiography are distinct workflows. Patient TV can use an added hospital alcove. Data center is conditional. See page 12.
Mechanical and water heating	P16–P22 7 system hotspots	Recommend 1 shared technical context, with service/exterior views as needed. See page 13.
Home and workplace extras	P23–P33 11 optional hotspots	Add audio, IT, garment care, air care and cleaning products in existing rooms. See pages 14–15.

What can be counted now

Baseline: 14 scenarios and 32 product hotspots. P01–P33 provide 33 optional product or system hotspot roles. Select the required roles before fixing an expanded total; some are alternative configurations. Data-center content and its hotspot count remain a separate decision.

A broader-coverage plan should add the shared mechanical context first: 15 scenarios if it fits one connected setting. Other new scenarios are chosen only when separate immersive visits are required. The final scenario, panorama and equipment totals depend on those choices.

This is a family placement plan, not a verified list of every current Canadian SKU. LG's current catalogue export closes that final coverage gap. All scenes and variants must use one coherent building model.

Add kitchen and laundry formats

Kitchen layout option

Added hotspot	Documented model or family	Placement decision
P01 Cooktop	CBIH3017BE Induction cooktop	Add a countertop cutout. Gas and radiant cooktops use different cutout/utility variants.
P02 Wall oven	WSEP4727F Single wall oven	Add a tall-cabinet or approved under-counter oven position. Combination and double ovens need cabinet variants.
P03 Hood	LSHD3080ST Wall chimney hood	Add above the cooking surface with an approved duct and clearance layout.
P04 Microwave	MSER2090S countertop MVEL2033F over-the-range	Countertop can coexist with P03. Over-the-range replaces the overhead hood layout; built-in use needs an approved trim kit.

Room choice: use a second layout of the existing kitchen, or add one built-in kitchen scenario with four hotspots. Column, side-by-side, top/bottom-freezer, kimchi and specialty refrigeration use additional cabinetry variants of hotspot 15; a pantry is optional.

Laundry layout option

Added hotspot	Documented model	Placement decision
P05 WashTower	WKHC252HBA	Full-height tower bay. Model the tower as its own product form, not two baseline assets stacked.
P06 All-in-one washer dryer	WM6998HBA	Separate combo bay. Both can appear together, or be alternate configurations of one comparison bay.

No added room is required if the existing laundry has adequate space. A separate comparison scenario adds one room and two hotspots. Appliance doors, service access and utilities must remain credible.

Add display installation types

Use these added hotspots in the existing lobby, supermarket, restaurant or exterior. A dedicated display gallery is optional when the building cannot accommodate the installations.

Added hotspot	Documented model or family	Where and what changes
P07 Transparent OLED	55EW5G-A	Lobby or retail showcase. Dedicated support and signage box; moving content only. Other OLED signage needs its own format variant.
P08 LCD video wall	55VSM5J-H Example: 2 by 2 wall	Lobby/gallery wall. One system hotspot can describe four physical panels. Support, alignment and signal layout are separate assets.
P09 Interactive kiosk	27TNF3K-S	Restaurant, supermarket or lobby. This open-frame touch panel needs an enclosure, software and any peripherals.
P10 Window-facing LCD	55XS4P-B	Inside a storefront, behind glass. Keep separate from exposed outdoor hotspots 04, 05 and 29.
P11 Ultra-stretch signage	LG ultra-stretch family Exact model pending	Supermarket fascia or approved lobby/elevator header. Add elongated geometry and matching content.
P12 Direct-view LED	Indoor LED / MAGNIT Outdoor LED	Indoor wall or exterior facade variants. Choose an exact cabinet layout, controller and power system before counting components.

More families without another room

Professional TV can use a restaurant/lobby display variant. Hotel TV can use a guest-room variant of the bedroom. Healthcare TV has a separate hospital placement at P15. Signage CMS, remote management and maintenance software belong in approved information tabs or demos, with no extra physical product position.

A video wall, transparent OLED, LED wall and ordinary LCD have different installation needs. They may be catalogue alternatives, but cannot share an automatic visual replacement rule.

Add specialist contexts where needed

Medical extensions

Added hotspot	Documented model or family	Scenario decision
P13 Surgical monitor	27HJ713S-W 32HL714S-W	Add a surgical context if hotspot 01 remains a consultation/review desk. One selected monitor; clinical approval determines the choice.
P14 X-ray detector	LG digital X-ray detector family Exact model pending	A radiography room is conditional on showing image acquisition. Otherwise use a product detail or workflow card in the hospital.
P15 Patient-room TV	LG healthcare TV family Exact model pending	Add a patient-room alcove or hospital room layout. This is a television role, separate from clinical/diagnostic monitors.

Surgery and radiography are different settings. If both require immersive visits, plan two additional scenarios rather than combining them into one generic medical room.

Data-center cooling option

Add a data-center scenario only if LG wants to demonstrate server-cooling workflows. Otherwise, introduce this family through the mechanical system information.

Family to represent	Suggested placement	Quantity decision
CDU and cold plate	Liquid-cooling detail beside the server rack	Exact equipment, system relationships and hotspot grouping pending LG selection.
CRAH and FWU	Air-cooling equipment beside the data hall	Separate from residential climate units. Chiller connection refers to the plant at P21.

Medical products require Canadian intended-use and hospital review. A detector is only part of a radiography system. These examples do not certify clinical, regulatory or engineering suitability.

Add a shared mechanical context

Recommended new setting: a connected mechanical/service area with an exterior or roof view where required. It explains the systems behind the six climate hotspots already reserved in the baseline.

Added system hotspot	Canadian family to represent	What the view must show
P16 Outdoor heat-pump system	Single split / multi split MULTI V 5 / MULTI V S	Matched outdoor equipment and links to selected indoor units. Air-source layout variant.
P17 Water-source VRF	MULTI V WATER 5	Water-loop mechanical layout. A distinct variant from the air-source system at P16.
P18 Fresh-air ventilation	ERV	Ventilation unit and credible duct/service routes. A ceiling cutaway may work better than a room view.
P19 Hot-water system	Hydro Kit Monobloc air-to-water	Alternative hydronic/water-heating configurations, with their approved piping, tanks and outdoor context.
P20 Air handling	AHU / MULTI V integration	Air handler, interface and duct connections. Exact integration hardware to be specified.
P21 Chilled-water plant	Air-cooled scroll chiller	Exterior/roof equipment and the selected water-system connections.
P22 Controls	Local / central controllers BMS gateways	Room or service-panel controls with approved system links. Can also appear in existing room layouts.

These are seven proposed system-story hotspots, not seven complete equipment units. LG must supply the selected model numbers and configured bill of materials. The number of physical assets and panoramas follows that design.

At minimum this adds one technical context to the 14-scenario baseline. Roof, plant and service cutaways may need additional viewpoints; they do not automatically become new rooms. The business air-to-water portfolio boundary remains an LG decision.

Add electronics in existing rooms

These placements broaden the catalogue without requiring more rooms. Keep them separate from the existing TV and climate hotspots.

Added hotspot	Documented model or family	Where it belongs
P23 Audio installation	Sound Suite H7 Soundbars / home-theater systems xboom / Bluetooth speakers	Living room or theater. Select an audio configuration; subwoofer and satellite components occupy their own physical positions.
P24 Projection	CineBeam / portable projectors Business ProBeam	Theater or meeting-room variant with screen, throw distance, mounting and light control.
P25 Laptop	gram Pro 16Z95U-G.AU88A9 gram / gram Pro family	Office, meeting or reception desk. Confirm exact Canadian configuration before asset production.
P26 Portable monitor	gram +view	Desk companion to a laptop. Adds a screen and support footprint, not a standalone computer.
P27 Cloud workstation	All-in-one thin client Desktop thin client / zero client	Office, meeting or reception workstation variant. Add client hardware and approve the host/VDI workflow.
P28 Mobile lifestyle screen	StanbyME Lifestyle Monitor Swing Smart monitor family	Living, bedroom or office floor placement. Model the mobile/adjustable stand and movement envelope.

Existing monitor and TV hotspots can do more

Use approved variants at 13, 14, 24 or 31 for UltraFine, UltraFine evo, UltraWide, UltraGear, UltraGear evo, OLED gaming, Hyper Mini LED, professional, Full HD, QHD and smart monitor formats. TV variants can include OLED, QNED, NANO 4K UHD, Micro RGB evo, Gallery, Wallpaper, True Wireless and ultra-large sizes.

Resolution, gaming, Copilot+ and premium collection labels overlap other categories. LG SIGNATURE and LG STUDIO are cross-category collections too. They do not each require a new hotspot. Accessories use product tabs unless the installed component changes the visible configuration.

Add home care in existing rooms

Added hotspot	Documented model or family	Where it belongs
P29 Garment care	Styler SC5MAR4G	Laundry or bedroom dressing niche. Add a full-height cabinet and door-opening space.
P30 Cleaning	Stick vacuum and docking family	Laundry or utility closet. Add the appliance, charging/storage position and compatible accessories.
P31 Air purification	LG air purifier family Exact model pending	Living room, bedroom or office floor position. Keep airflow and service space clear.
P32 Dehumidification	LG dehumidifier family Exact model pending	Laundry or service area. Allow tank access or an approved drain route.
P33 Wellness seating	LG massage recliner family Exact model pending	Living/bedroom wellness niche with a full recline and circulation envelope.

Climate variants that stay in existing rooms

Portable air conditioners need a floor unit and window/exhaust-hose layout. Window air conditioners need a suitable window, support and facade projection. These can be additional climate variants in the bedroom or office; they do not automatically fit a wall-mounted heat-pump position.

Final choices for LG Canada

- 1 Supply the current Canadian catalogue export. Mark launch families, active model codes and discontinued products, including commercial and residential lines.
- 2 Choose each family's treatment: catalogue card only, selectable product at an existing hotspot, another layout, an added hotspot, or a new immersive scenario.
- 3 Approve exact model fit and assets. Provide dimensions, installation drawings, 3D/CAD, finishes and licensed images; approve medical use and climate system pairings separately.

The map covers the publicly documented building-related families reviewed. Current 8K TV, double-wall-oven and specialty wine-storage selections, some navigation-only categories, commercial laundry/builder-only lines if included, and the exact business air-to-water scope still need confirmation. Any wider personal-device/accessory portfolio is an explicit catalogue-scope decision.

Product sources for business and medical

Click a model name to open its official LG Canada product page. Sources were reviewed on 13 October 2026 UTC. A published page confirms documentation, not current stock or approved interchangeability.

Production rule

Catalogue choices can appear in an information panel immediately after content approval. In a fixed 360 panorama, a visible product change needs an approved alternate render. In real-time 3D, only approved product and layout groups should be selectable. All variants must share the same coherent building geometry.

The current Canadian model export, selected system configurations and approved assets remain the final coverage test. This document maps placements; it is not installation, engineering, medical or regulatory certification.
