

Your project selection

LG Canada | Virtual showroom

Your project brief

Explore relevant products in one coherent residential environment.
Capture the selected spaces and the information needed for review.

Selected environment	Residential concept
Product selection	To be validated by LG
Canadian models	Approved data required
Configuration	Illustrative selection

Continue with an LG representative

Confirm the customer requirements and approved product options.
Use the existing Canadian B2B contact journey in the final experience.

Project content and customer data are examples only.

A clear next step

Customer dossier | Review checklist

01 Validate the application

Confirm the intended space, installation requirements and relevant Canadian product family.

02 Confirm the selection

Review model information, availability and approved supporting documentation with LG.

03 Keep the project in context

Attach the selected environments and, in Best, the saved configuration so the follow-up reflects the shared visit.

04 Agree the next action

Record the customer request and route it through the agreed LG sales workflow.

Consent, retention and integration rules are defined before launch.
This sample contains no customer data or approved product specifications.
